EDUCATIONAL YEARBOOK

of the International Institute of Teachers College, Columbia University

1927

Edited by I. L. KANDEL

Professor of Education and Associate, International Institute, Teachers College, Columbia University

This volume is the fourth Yearbook of the International Institute and describes the educational systems of fourteen countries—Belgium; Denmark; England; France; Germany; Hungary; Iraq; Lithuania; Mexico; Russia; Serbia, Croatia, and Slovenia; Spain; Turkey; and the United States. These accounts give a clear idea of the major problems in educational development confronting these countries today.

In addition to these national surveys a section of the book is devoted to Teacher Training, and this problem is treated for four leading countries—England, France, Germany, and the United States.

Each article of the Yearbook has been prepared by an eminent authority on education in the country surveyed.

618 pp. Price, $3.50

The Yearbooks of 1924 to 1926 are also available—thus providing a complete picture of the educational systems of forty-three nations
